METHODIST ELEVEN CATCHES SPIRIT OF OLD GOLD DAY

## TOUCHDOWN HELPS VICTORS formed on standing water.

The Methodist eleven caught the holiday spirit Saturday, celebrating Old Gold day by defeating Rose Poly, 14 to 6. The Engineers fought as never before this season and threatened to win at times, but the De Pauw defense always braced and held for downs in the shadows of its goal posts. The Methodist attack also was stopped within the five-yard line on o less than three occasions.

It took a touchdown made by the risitors on a forward pass early in the second period to nerve the Meth dists up to their best. On the next kick-off Rowan ran through the enire Rose team for a marker and then placed the local collegians in the lead y kicking goal. The Methodists then ecame obsessed by a spirit of lethergy, which they did not shake off entil near the close of the game, when they marched almost the length of the gridiron and then sent Foote over for the second and final counter Rowan kicked an easy goal.

Lineup and summary of the Ros

Poly game:	
DePauw.	Rose Poly.
Woodruff	Left end Davis (C.)
Northway	Left tackle Bake
Denton	Left guard Henry
Meredith	Center Floyd
Baumunk	Right guard_ Woodling
Dunn	Right tackle Barnes
Wylie	_Right end Or
Pence	Quarter Buck
House	_Right half Goldsmith
Foote	Left half Grafe
Rowan, (C.)	Full Yatske
DePauw	0 7 0 7—1
Rose	0 6 0 0
Touchdow	ns-Rowan, Foote, Davis
Coals from	touchdowns-Rowan, 2.

Substitutions-(DePauw), Ander son for House, House for Anderson Tway for Denton, Ellis for Foote Lynch for Tway, Anderson for House, Foote for Ellis. (Rose Poly), Miller for Buck, Crapo for Miller Hauck for Crapo.

Officials-Messick, Indiana, refered Robinson, Indiana, umpire. Wilder Purdue, head linesman. Time of quar ters, 15 minutes each.

The fire department was called to make a short run about noon today, when they received a call from Crawford restaurant, saying the Bartley home was afire. Mrs. Earlle Stroube who is visiting Mr. and Mrs. E. R. Bartley, saw the electric lights burning in the basement and thinking that the house was afire, became frightened and gave the alarm. One Crawford restaurant near the Bartley home, heard the woman crying "fire' and sent in the call that the Bartley house, on south Indiana street, was on fire. Owing to the noise in the restaurant and on account of the boy's hurry to give the alarm the call was understood to be the house back of Gardner's on south Indiana street. The fire department made a run to the corner of Parke and Indiana streets only to find no sign of a fire. One of the firemen called the restaurant by phone and learned that the fire was at the Bartley residence. The department made the run to that place and found that the alarm was caused by the electric lights in the

# **MOCCASIN TRAIL** CASE UP AGAIN

FAMOUS CLOVERDALE TOWN-SHIP ROAD CASE ON TRIAL IN THE CLAY COUNTY COURT THIS WEEK - CONTROVERSY OVER THE CENTER LINE OF A ROADWAY IN WHICH ENTIRE NEIGHBORHOOD IS ENGAGED.

### CHANGE OF VENUE TAKEN

charge of the Methodist Orphanage, those interested in the Moccasin trail case arrived here from Greencastle, ing days have been arranged. The this morning, John H. James, one of the attorneys in the case received a telegram telling of the critical illness of his daughter. In view of the fact that Mr. James would be unable to proceed with the trial of the case Judge Rawley continued the case in

> The famous Moccasin Trail road controversy, which for the past ten or more years has kept the people of southwestern Cloverdale township in a turmoil, is again up for trial. This time the case is being heard in Clay County, where it was taken on change of venue.

> Beginning in the justice of peace courts in Cloverdale township more than ten years ago, the controversy over the establishment of the cente line of this road, which is not more than a lane, has continually been in

John Bell, a leader on one side, i backed by many of the men who own land along the road. These men are attempting to have the center line of the road established and placed o court record. These men are contending that the center line of the road b established in the center of the trav eled way.

In order that this might be done petition was filed with the county ommissioners, asking that the cente of the traveled way be established a the center line of the roadway.

William McMains and Daniel Macy who are making the fight against Bel and his followers, contend that the section line should be established as the center line of the road. They contend that should the traveled way line e established they would loose valu able land, which would be cut off a part of the road.

When the case was tried by the county commissioners they found in favor of Mr. Bell and ordered that the center of the traveled way be established as the center of the road. Mcchange of venue was asked and the

#### POLITICAL GOSSIP. -

(By Willis S. Thompson.)

INDIANAPOLIS, Ind., Nov. 15 .-The suit which has been brought by the republican state central commi tee in a Marion county court, pretend ing to test section ten of the primary law, and incidentally to pretend move in the interest of progressive is not fooling anyone. It is best disposed of in this editorial comment in the Indianapolis Star:

"In view of the fact that the Su preme Court is to pass on the constitutionality of the primary election law within the next few weeks, the test suit filed in this county, with Carl H. Mote as the plaintiff, seems rather uncalled for unless the purpose, as reported, is to pull the wool over the eyes of the Progressives in the hope of convincing them that the local Republican organization is anxious to make it easy for them to act with the G. O. P. at the primary next March.

"It might not be amiss to remind the local Republican leaders that perhaps the Progressives are not worried as to whether they are to b permitted to affiliate with either of the old parties at the primary. Th constitutionality of Section 10 of the primary law attacked by the local and state Republican committees has been upheld by Judge Paris, Democrat, of New Albany. What difference will it make if it is set aside by a Republican judge in Marion county?

"The Supreme Court will have the last word and it will speak in due The attempt of the Republicans to play politics in this litigation will not be taken seriously outside of their own camp. The Mote suit, as a matter of fact, is a sort of fifth wheel to the entire proceedure. It is to be hoped, however, that the Supreme Court will clear up the uncertainty regarding a number of provisions of the law. Until that court speaks, it might be just as well for the Republicans to sit still in the boat and await results."

#### NEW ATTORNEY GENERAL TO GIVE WIDOW \$2,500 A YEAR.

(By Willis S. Thompson.)

INDIANAPOLIS, Ind., Nov. 15 .-The appointment of Evan B. Stotsenburg of New Albany as state attorney general to succeed to the late Richard M. Milburn, stands as another act of Governor Ralston which all the people of the state will commend. As attorney general Evan B. Stotsenburg will rank at the head of the list of strong men and able lawyers who have held the office in the As a member of the general assembly for several terms, his first member of the house is 1895 being followed by two terms of four years each in the state senate As a member of the state senate there are more good constructive bills credited to him than to any other man who has ever been a member of either branch of the general assembly. His record has always been one of construction.

He was more largely responsible than any other in the preparation of the primary law passed in 1915 and he was one of its most earnest advocates at the time of its passage. When an attack was made upon the law he was called upon by Governor Ralston and Attorney General Milburn to conduct the defense. He will now appear in the supreme court in official capacity to sustain the law.

Born in New Albany fifty years ago, he has been a practicing attorney with his office at New Albany for thirty years, and he has had an excellent practice. For the remainder of the term for which Mr. Milburn had been elected, Mr. Stotsenberg will turn over to Mrs. Milburn \$2500 a year of the salary of the office. He

#### BARTENDER MAKES FORTUNE KEEPING CLEAN

The success of a bartender in the noving pictures business as told in the December Woman's Home Companion is an excellent illustration of what the public wants and how the exhibitor can grow rich by giving it to them. A few years ago one of the eading New York exhibitors was working behind the bar.

"He saw some motion pictures realized their wonderful entertainment value, and decided that here was his big opportunity. He rented the empty room above saloon, got a crub-brush, some strong soap and a pail of water and scrubbed the place n his hands and knees.'

Cleanliness was his slogan films as well as his theatre.

"Any picture that he thought was bad he would not show. Objectionable parts of other films he cut out after marking the place so that the piece could be inserted again before the film was sent on to the next man on the circuit."

Soon he had to move his theatre because of increased business. Then his success was so great that he tried his luck in New York. Today he is the proprietor of one of the largest and finest theatres in the city.

#### A Christmas Plum Cake.

"The most attractive sort of plum cake for the Christmas supper table," says a writer in the December Woman's Home Companion, "is one decorated with a wreath of holly. And when the wreath itself may be safely eaten and forms, moreover, the most delicious portion of the cake, it is especially desirable to know how to make it.

"First the cake must be smoothly and thickly iced with a rich boiled icing. Then the leaves are arranged on its surface while the icing is still a little soft. To make the leaves, slice green citron in thin transparent slices, and from them cut leaves in the shape of the holly leaf. A genuine holly leaf may be used for a pattern; have your knife sharp and you will find this making of the leaves a simple matter. When the wreath is formed place small scarlet andies at intervals among the leaves to stimulate the berries. A design of leaves and berries may also be arranged in the center of the cake.

"Mistletoe wreaths are made in the ame way, the leaves being slightly onger and more pointed in shape than the holly leaves. Mistletoe berries are formed of white candies. Such a decoration is best on a chocolate iced cake."

#### NOTICE OF ELECTION OF DI-

RECTORS. Notice is hereby given that a meet ing of the stockholders of the Greencastle Savings & Loan Association will be held at the office of the said ation at the City of Greencastle ounty of Putnam, State of Indiana, on the 6th day of December, 1915, at 7 o'clock p. m., of said day, for the purpose of electing two directors for the ensuing three years and for the transaction of such other business as may properly come before such meet-

### Notes and Comment

Of Interest to Women Readers

#### For the Housewife.

An excellent substitute for cloth is window washing is an old newspape or a chamois skin, which should be wrung from the water and passed rapidly over the glasses

If the house is infested with ants dip a sponge into sweetened water and lay it where they can get at it They will soon cluster upon it and the sponge can then be dropped in hot water.

If a cake sticks to the pan, turn the pan upside down and lay on the bottom of it a cloth wet with cold water. After about five minutes the cake an usually be removed quite easily

A simple method to soften hard water is to boil it for a quarter of an hour, pour it into an earthen jug, add a quarter of an ounce of common soda to each two gallons, stir, and when cold carefully pour off the clear wat

Almost every one has the exper ence, when filling and icing a layer cake, of the layers slipping and slid ing, thereby causing an unattractive looking cake whon dry. If you will stick two or even three of the skew ers used by butchers down through the layers they will hold the cake in place until set.

If your vegetables or preserve scorch while cooking, advises a cook remove the vessel instantly from the range and set it in a pan of cold water, letting it remain there for ten o fifteen minutes. At the end of that time you will find that the scorche taste has all vanished from the food When cooking cabbage, turnips, o onions boil at the same time some vir egar with few spices. This will de stroy all vegetable odor. When boil ing a ham leave it in the water in which it has been boiled until it quite cold. This will make it ju and quite tender.

Jonquils and daffodils are placed to advantage in a brass or copper urn o

Stale macaroons, which can be bought cheap at the baker's, make the tastiest addition to pudding an custards if pulverized and sprinkle over the top.

It is a good plan to keep the ove door open part of the time when no in use, so that all traces of gas o odors of food may escape

When apples have to be cored bu served whole, it is advisable to cor before peeling them, as they are the less liable to break. Should you spill hot fat on the flee or a wooden table, pour cold water

upon it at once. It can then be me easily scraped off, not having had time to sink into the wood. Folding coat hangers that fit in flat leather case are useful for the

traveler, for whom also are designed equally flat cases that contain folding Pullman slippers of soft leather. Instead of always folding table cloths and sheets lengthways, it is an

excellent plan to sometimes fold them the other way so that the folds will be changed. Jam which has been laid aside lone and has got hard and sugary and unfit for use can be made quite as good as when new if it is put into the ov

en for a little while till the sugar

melts and then left to cool If walnuts or any other kind of nut are packed in layers of sand and kep in a cool place they will keep fresh for an indefinite period. Soak then in warm water for an hour before u ing if you would have them peel as if they had just been gathered fresh from the tree.

#### Fruit Dishes.

The fruits are so delicious and last so short a time that we should utilize them to the full to provide variety for

our menus A thoughtless or uninterested hour keeper will so often order "blanc mange and stewed fruit today" an stewed fruit and custard tomorrow. but surely we can do better than this, although it is really more in the fresh methods of serving than actually nev dishes that our changes will be dis covered, says the Queen (London)

First, be sure that simplest dishe are perfectly prepared. Let the bland mange be a lustrous jelly, just the usual one and a quarter pint of milk and three tablespoons of cornflour. simmered eight minutes and stirred all the time; or, if ground rice is used, add a well beaten egg and be careful it is not too stiff.

Custard could be made the previous day and thoroughly beaten till smooth, or, if preferred, make it rather thick er than usual and turn out as a mold. Cook a rice pudding in a porridge saucepan for four hours till a creamy

mass; or if using fine tapioca or semo. lina, add an egg when cooked and bake in a pie dish till set; rice cream can be set in a border mold or in tiny cups, and with all these accompani ments, be sure that whatever "stewed fruit" is used is gently simmered till tender in a little thick sugar-and-wat-

But many fruits are really much nicer made into a puree as follows: Stew the fruit till tender with a little water and sugar to sweeten in a jar in the oven, then rub through a sieve gooseberries are the best.

COMFORTING WORDS.

#### Many a Greencastle Household Will Find Them So.

To have the pains and aches of a ad back removed—to be entirely free from annoying, dangerous urinary disorders, is enough to make any kidney sufferer grateful. The following advice of one who has suffered will prove comforting words to hundreds of Greencastle readers.

Mrs. M. Hinkle, 317 N. Jackson ded life?" asked Nalor. St., Greencastle, says: "My back was so lame and such pains darted through it, that I could hardly sit down or get up. At night, I couldn't even turn over. I became worn-out and nervous, had dizzy spells and black spots came before my eyes. My kidneys acted too often and the kidnev secretions were unnatural. I began using Doan's Kidney Pills, procured at the Cook Drug Co., and three boxes freed me from all trouble."

Price 50 cents, at all dealers. Don't simply ask for a kidney remedy-get Doan's Kidney Pills-the same that Mrs. Hinkle had. Foster-Milburn Co., Props., Buffalo, N. Y.

# ESKIMOS GORGE

ONE OF THEM EATS 4 POUNDS OF MEAT IN DAY WITH NO ILL EFFECTS

Copenhagen Resident on Contrary, Lives on Potatoes.

Two studies recently made by Eu opean scientists illustrate the range n nutritive conditions to which the uman being can adapt himself.

In one case an Eskimo on the island of Dico in western Greenland conumed in one day nearly four pounds of boiled meat corresponding eighty-five grams of nitrogen and 218 grams of fat. This is said to be far below the record figure among these people who eat very large meals at rregular and somewhat infrequent in ervals.

Indigestion and other nutritive disorders however, are rare among them and their physical endurance and resistance to cold is very high. way the above extraordinary meal was utilized by this Eskimo ound to be very satisfactory.

The other study was of a man in Copenhagen "who was able to mainain himself in excellent nutritive equilibrium and muscular efficiency hrough long periods of months, no nerely days, on a diet essentially omposed of potatoes and margarin. Four pounds of potatoes were eater aily yielding 3.62 grams of digestible nitrogen, which with the margarin amounted to 3,900 calories.

When hard work had to be per ormed this man ate eight pounds of otatoes with liberal additions of far o that the entire energy content was rought up to 5,000 calories with 10 rams of digestible nitrogen. atation of the stomach was found esult from these monster meals.

Such curiosities of the literature of utrition simply show the great adapt bility of the human organism which has enabled man to live in every re gion of the earth. It is needless to say that neither the maximum nor the minimum of any nutritive ele-ment is desirable. The normal individual lives in the safe medium.

During the gunning season a beloved brother from a big city borrow ed a gun and went in quest of wild He was successful beyond his wildest imagination for he hadn't been rowing up stream more than three hours before he came upon a beautiful flock feeding in a little cove. In stantly the city man's gun went to his shoulder.

"Hey, there, ye consarned rabbit!" came the expostulating voice of Uncle Josh. "What in thunderation are ye ryin' to do?"

"I am shooting wild ducks," answer ed the city man, in a cautious whisper. Don't come any nearer or you'll

care-"Them ain't wild ducks," was the exercised rejoinder of the farmer, 'Them's tame ducks!"

published by the department of agri-culture, one of the most serious sources of loss to sheep owners in the western states, especially Wyoming and Montana, is zygadenus (of several species) or death camas; also known under various other popular names, including such preposterous misnomers as "lobelia," "wildonion" and "water lily." Strange to say, a great many sheep owners do not know the plant, and ascribe the poisoning it produces to other causes. pines have been blamed for many cases of zygadenus poisoning. It is said that in 1909 about 20,000 sheep were killed by this plant in a single county in Wyoming.

Other animals seem less susceptible to its effect, though horses, cattle and human beings are made ill by it sometimes with fatal results. Coville has reported that one species is some times used by medicine men of the Klamath Indians, mixed with the dried root of iris missouriensis and a little tobacco, to give a person a severe nausea, in order to secure a heavy fee for making him well again

The authors of the bulletin above mentioned report the results of elaborate experimental studies of this plant, extending over a period of five years. They are able to present a much more extensive account of the symptoms produced by the plant than has hitherto been available. Every effort was made to find some effective remedial treatment, but without satisfactory results. Frequent doses of tannic acid or sodium bicarbonate aid in recovery, but the expense of such treatment is prohibitive, except when the animals are especially valuable. The only method of reducing losses appears to be to make the plant better known to shepherds, so that they will keep the animals away from it. Scientific American.

#### TELLS HORSE STORIES.

#### Writer Relates of Animal That Can Go Home Alone.

A man living near Litchfield, Minn., has a horse that takes his children to school in Litchfield every morning. When the "kiddies" get out of the buggy they tie the lines to the dash and the horse goes home alone. He always stops at the same place and waits there until someone leads him to the barn. A number of horses were employed to haul material from a large building excavation to a point some squares away. It was only nec essary to station men at the loading and unloading points, the intelligent animals passing between the places without the direction of drivers thus affecting a considerable economy in wages. Another horse, the property of Chicago man, which was recentstolen, after the lapse of a few days turned up at his proper home drawing a spic-and-span wagon and proudly wearing a brand new harness Inquiries by the owner of the hors for the proper owner of the wagou and harness evoked no response which, upon reflection, is not so expli-

#### Old Stuff in People's Garrets Very

Often Valuable. People want strange things. yould imagine, for instance, that any one should want a newspaper of Oct. 10, 1884? Or an old hair sofa? Or your discarded gold teeth? Or the musibox you were so proud of before the talking machine laughed it out of the parlor and into the garret?

Yet, somebody might want these things. Thousands of people have stuff littering up their houses which Thousands of people have they think is useless, but which they hesitate to throw away for some known reason. Perhaps in Philadelwants just what you have and who is willing to pay for it, perhaps your storeroom has in it an antique, useess to you, but which would be a gem

to a collector of such things. There was a man in Philadelphi: year ago who wanted one of the medals given out by the Record a the national export exposition in 1899. We know he wanted it cause he advertised in the pa pers for it. He placed an advertise ment in the wanted column, after he had found that the Record did not have any more. And he found a man in Germantown who had one in an old drawer of his desk. The first man paid the second man \$1 for it, although its real value was considera

The man who got the dollar had : habit of reading the want ads. Others have the habit, too. It is a good thing for any man or woman, especia ly those who have a lot of old junk lying around.

## O+O+O+O+O+O+O+O+O+O+O+O+O OUR BOYS and GIRLS

Who are the boys that succeed in the world? This, my young friends is a very important question for you to answer. Shall I answer it for you? As you and I are strangers, let me say that I have had thousands of boys under my care as a teacher, and that I know who succeeded in all the nobler walks of life. I have watched those successful in the schoolroom, in the store, in college, on the farm-

SUCCESSFUL BOYS

One trait of character is possessed by all of them in a greater or less de-gree, viz., they all have great powers of concentration. Whatever they do they do with all their might

In a lesson to be learned they bring all the powers of their mind to the task until it is mastered. They do not allow their minds to wander off, now upon this subject and then upon that, but, with an iron will and an unconquerable determination, they give the task to be performed, whether of the head or the hand, undivided and close attention till the work is done

This power of concentration is the ecret of one scholar's success over another in the same class. How you study is of far greater importance than what or how much you study.

I have in my mind now several of my old scholars who are eminent as lawyers, physicians, ministers of the gospel, civil engineers, builders, merchants and farmers, all of whom were noted in school for their undivided and close attention to whatever was to be done, either at their deak in preparing their lessons, or in the classroom at recitation.

I remember one of these boys in particular, although it is nearly thirty years since he was a student in my school. I can see him now at his desk, working at a difficult problem in algebra or arithmetic, or trying to translate a sentence in Latin or Greek.

It mattered not what the study was, he always entered upon it with the same resolute determination to master it in the least possible time. He seemed to bring his whole body as well as the powers of his mind, to the accomplishing of his task.

Now he would extend one leg and then the other, now run his fingers through his hair, his eyes meanwhile intensely fixed upon his book, and he saw nothing, heard nothing, until that lesson was thoroughly prepared.

He never failed at recitation. That boy has been for several years one of the most prominent judges in this country and one of the most eminent of the governors of New Jersey .- Arkansas Optic.

#### THE STORY OF MRS

QUACK-QUACK

Last summer Ethel visited her aunt who lived on a farm. Aunt Mar-tha raised lots of chickens and ducks. Ethel was particularly interested in the baby ducks. There was one little brown and white duck that she made a pet of.

When it was time for Ethel to return home she hated to leave her pet duck, so Aunt Martha said: may take the little duck home with you, Ethel. If you take god care of it, it will grow to be a big duck.

Uncle Jim cut holes in a shoe box and put the little duck in the box. Ethel carried the box carefully. In the trolley car she placed the pox on the floor, and the other passengers were amused to see the duck stick its head out of the holes.

When Ethel got home her mother What a e you going to do with that duck? I see afraid it will be lonesome by itself. It you put it in the chicken yard the cneckens will pick it and probably kill it."

"No I don't think the chickens will hurt it. At aunt Martha's the chickens and ducks run together," replied

At first the chickens were afraid of the little duck, but after a short

time they became friends with it. The little duck grew and grew until it became a big duck. Then Ethel named it Mrs. Quack-Quack, because when she talked to it, it answered:

"Quack-quack." When spring came Ethel began to look for duck eggs. One morning she found a big white egg on the floor of the chicken house. After that there was an egg nearly every morning. Ethel said: "Mrs. Quack-Quack lays a

fresh egg for my breakfast." Just a few days ago Mrs. Quackquack began to act queer. When Ethel's mother went into the chicken yard the duck would try to bite her skirts and would make a hissing noise. said Mrs. Morris: "I believe that duck

wants to set." Ethel wrote and told her aunt about Mrs. Quack-Quack. Aunt Martha sent 13 duck eggs for the duck to set on So a nest was made on the floor of the chicken house and Mrs. Quack-Quack is sitting patiently on the eggs.

Ethel can hardly wait for the our weeks to pass before the eggs will hatch. She expects to see 13 little

baby ducks running around. Mrs. Morris says: "Ethel don't count your ducks before they hatch."

sponse, 'and you may keep the yard you've torn off.'" "Yes," said the congressman, with as progressive in buying its smile, "we go out frequently." and serve in a glass dish, with cream stock, and thus knows how to 'But," urged the darkey, "ain't yo' or custard on top. # CUMA

\*\*\*\*\*\*\*\* By ROSE HENDERSON

ht Paget Newspaper Service Below were the gray depths that lay slumbering and mysterious beand the cliff's ragged edge. Above was the clear, calm, interminable blue. Cuma Ventura crouched in the warm sand, leaning her head against the rough rock at her side. Behind her were thick short cactus bushes growing in scattered clumps and back of these the sides of the mourtain rose, steep, jagged and barren. The rock was warm against her cheek though the sun was an hour below the Guadaloupe peaks and the cactus hadows were growing darker on the

long slopes. The air seemed heavy

with silence. No bird sang. A vine-

gerone slipped under a stone at the

edge of the cliff. The girl sat quietly, her head bow ed. The heavy, dark braids were bound with bands of glittering beads. in the distance sounded the faint tinkle of sheep bells and the duil barking of a dog. At these sounds the girl raised her head. She snatched from her neck a small round lock et, stared at the trinket a moment as it lay in her hand, and then fung it over the cliff into the chasm be Her slim brown face was flush ed; her eyes were large with pain, but there were no tears in them

meant not anything to himthing," she (muttered. The as slowly becoming real it came with the weight of death itself. It was hard to believe after the beautiful dreams, so hard There would be nothing more to be happy about. She would have to Petro as her father wished. Duro, her pony, and the new saddle would be his. He would beat the lit tle Duro when he was drunk, and her, too, he would beat her of course when he was jealous and angry.

At the thought of the ugly Mexi can suitor her face broke into quick angry frowns. She pulled her long braid over her shoulders. Pierre had patted them once as she rode beside im and he had blushed forlishly. She hated herself for those blushes And when his hand had chanced to touch hers on the saddle horn, or when he had leaned over her, helping her to read the English books she had trembled with a new and elicious joy.

She had taught him to know the desert and the mountains. He vas often reckless in his ignorance. Once with her lips she had drawn the bicod from a rattlesnake bite on his arm and Pierre had called her a brave little nurse. They had ridden for hours for days together under the open sky Often they had sat here among the rocks before the cliff. He had called it "the edge of the world." Once when she stood very near the perilous brink, he had caught her back suddenly, tenderly, and her head had rested for a moment on his shoulder. Together they had felt the twilight come. She had listened to his talk of his own people, of the cold winters, the snow, the sleighing, and the strange noisy cities. She had listened with her heart beating fast, her eyes upon his face and her ears filled with the music of his voice. They had seen the stars come into the deep dark sky and had watched the blue and purple shadows that cling along the "edge of the world" after sunset. Once a mountain lion had crept upon them and Pierre had shot the creature with her gun. He was careless about weapons himself, and often went unarmed even after night-

Then he had gone away. His let er came explaining his hasty leaving. He would come back soon. How she wept over the letter and the desoate loneliness that came with his absence. But he would come back, and she waited. She had borne her father's drunken scolding and Petro's hateful presence, and she had been happy through it all. Now the thought of her happiness was more bitter than the memory of her misery. He had ne back and it meant nothing to him. He had played with her and then cast her aside, as she would gather a yellow poppy in the mountains and throw it away, thirsty and helpless, on the hot sand. The girl's breast heaved, her eyes glowed, little points of light scintillating in their still depths. She knitted her low dark brows and pulled the small silverhandled knife from her belt.

"He shall not go back," she said softly. Her fingers stole along the sharp blade, testing its keen edge, and her lips parted in a cunning smile. It was the kind of smile that flashed across old Diego's heavy lips when he was not drunk enough to be stupid and not soher enough to be azy. Cuma had hated her father for smile. Once he had stabled a half breed cow puncher because the mat, refused to trade ponies with him and Cuma watched the wretch reel from his saddle cursing. She had forgotten the ugly horror of it now and remembered only the quick, soft thrust of the knife.

"He shall not go," she repeated. She sprang to her feet with a swift easy grace. She was strong and supple and closely knit. Her slender, ided figure was as full of life as an antelope's. It was this abounding sor that had attracted the man she had grown to love. It had neld in

spite of the difference in their breed-\*\*\*\*\*\*\*\* spite of the difference in their breeding. Sometimes its grip was stronger than the call of generations of civilization and environment. She was so simple and so wholly a woman. And her mind was ready and eager to follow his. Sometimes he had won-broad it she wish not leave all was dered if she might not learn his way of life, but that was only when he had grown delirious with the sense of her. When he weighed the matter in sober moments he knew that this was impossible, that it would mean his coming to her level in the end.

Upon his return to the plains he had steeled his heart against her and she had felt the change in her first keen look. The desert wildness has not robbed her of the subtle intuitions of her sex. He did not see the fires of her hate. She hid them un der the heavy-lashed eyelids, and she stifled the hot pain in her breast. But the fires of her hate were burning and the pain in her breast was no dead. Twilight was creeping up the long valley and the girl's figure was blurred against the dull background. "He shall not go," she said again

and gazed over the edge of the cliff where the tiny gold locket had gone Then suddenly she stood erect lis

tening. There was the quick, soft steps of padded feet among the cac tus bushes, a rustle, and a low growl that sent a chill through the girl's warm veins. She sprang to her feet, quick-eyed and alert. There was no mistaking the sound. It was a panther. She felt in anticipation the sudden crushing of mouth and claw upon her, and every muscle was nerv ed for resistance. But the beast seem ed to be parrying an assault, and she peered into the cactus jungle at her back. Through the branches of a dwarf "saguara" she caught sight of long, tense body crouched above the ground. She watched it stealthily out of the tail of her eye. it was creeping forward with a sneal ing, cat like movement, but it was not coming directly toward her. The girl's head turned, following the animal's advance, but her body was still like the stiff motionless cactus be side her. Her fingers tightened the grip on the knife and the breath came noiselessly through her parted lips. In a flash her mind took in every detail of the situation, the yaws ing chasm a few feet in front of her the ragged mountain at her back, and the crouching beast advancing stealthily over the sand. All the fierce ss and cunning of the desert box enimal was reflected in the tens suppleness of her pose. Only on thing puzzled her, and that was the direction of the panther's advance. She was losing the yellow form n the deeper bushes at her back. Suddenly there was a scuffling and snapping in the shadows, a man's low curse and the ripping of the panther's claws against coarse clothing. In moment two bodies rolled struggling on the ground beside the girl. saw the man's arms tense and knot-ted against the beast's shaggy breast.

"Plerre! Pierre!" she cried breath-essly. He too, had been lingering

She saw his brown hair.

at the old trysting place.

The claws were buried in the man's houlders, the grinning mouth was reaching for his throat, but the brown arms with their rigid muscles held the creature back. The man's strength was being tested to the uttermost. His body swayed above the brute's His hands clutched the straining eck. They came nearer, almos gainst the girl's feet. She saw the man's arms bloody with cuts and scratches, his face white, his teeth she could hear his hoarse breathing. As they turned toward her she plunged the knife into the panther's taut, yellow throat.

The angered beast whirled about suddenly, dropped the man's shoulders and sprang upon his new enemy The girl crumpled under his weight, the knife fell, her hands clutched blindly at the open jaws. The man umped to his feet. The panther leaped forward against the girl's body the two, struggling together lurched over the cliff's edge and disappeared. The man flung himself on the ground and calling wildly, lean-ed far over the inscrutable depths.

But the girl did not answer. Her last glimpse of the world was a confused blur, the jagged cliff's edge and the sky's full crimson whirling madly, and then the blue and purple depths rushing upward as her feet left the earth. And on the sand at the rock's edge the silver handled knife lay dusty and blood stained.

Some time ago an old Indian in the west broke his axhandle, and a farmer, taking pity on him, fitted the tool with a new one from his own supply Then, noticing that the axe was dull, Uncle Josh decided to add to his kindness by sharpening it, and asked the Indian to turn the grindstone.

"Well, what is it?" wonderingly asked the farmer, noticing that the Indian persisted in waiting there after the job was done. "Is there anything else you want?"

"Yes, sir," was the prompt rejoinder of the Indian. "You no pay me."
"Not pay you!" exclaimed the farmer with a perplexed expression. "Not

pay you for what?" "For turn the grindstone," calmly replied the chief. "Twenty-five cents."

Naggsby-Do you know whether the Siamese twins were from the humbles class of their country?"

Waggsby-I had always had the idea that they were pretty well connected."

COSTA RICANS USE METHODS OF HUMAN WARFARE TO FIGHT INSECT FOE

Rockets Sprayed With Asphyxiating Gases Employed in Battle.

San Jose, Costa Rica.-This coun try has recently completed the des truction of an invasion of locusts. It was the first appearance of the in sect here since 1878, and was so ex tensive that it called for the re sources of the government to check it.

The population was for a time thrown into a panic, and even women and children turned out to fight the nsects. Some of the methods used in exterminating the pests were not unlike those employed in destroying human beings on the European bat tle fields.

The invading army was bombarded with cannon loaded with sand, and with rockets sprayed with asphyxiating gases and blown up with gunpow der. The torch was also used, and there was likewise let loose to attack the insects an army of coco-bacilli mortal enemy of the locust.

Disease among the locusts them elves, however, did most to destroy hem, as has sometimes been the casn human armies.

The locust came over the border rom neighboring Central American republics. The press of the latter had been reporting the devasting effects of a locust plague for a year, which were so alarming that the Costa Ri can government made preparation for an invasion of its territory.

Disheartening reports reached her ot only from Guatemala and Hon duras, but also from Salvador and Nicaragua, where, through neglect of or other reasons, no efforts to eradi cate the plague were made either by the government or by private agr ultural interests.

The damage the insects wrought or rops in those countries advanced cereal prices to such an extent that their governments were forced to im port large shipments of grain which vere sold at moderate prices.

This, together with the increase in he rate of exchange caused by the European war, caused dealers in this country to ship large quantities of grain to these markets. This re ulted in a considerable increase in the local market price and all grains inderwent what might be termed a

In view of the excellent prospects for the sale of the next crop, all farmers in this country, notwithstanding he threatened plague, were attracted to the planting of cereals and large racts of land were prepared and cul

As a warning of the impending per a small swarm of locusts invaded osta Rica territory by the province of Guanacastle, but owing to the prompt action on the part of the gov rnment with sand loaded cannon and ockets, the swarm was easily repuls ed and turned back into Nicaragua erritory.

After this, two or three months elapsed in which the government had time to make more elaborate preparaions and adopt special measures. certain quantity of coco-bacilli was imported by the ministry of public works, which was cultivated in the national laboratory and held in readi ness. Almost all signs of the danger seemed to have disappeared, when about the middle of May one horde after another invaded Costa Rican territory on the Nicaraguan border.

The swarms were nu huge proportions. Everybody, with out exception, helped in one way or another to destroy the insect. vate subscriptions were raised and in many towns invaded the women and children turned out with torches lamps and other implements to aid in its annihilation.

#### Indigestion and Constipation

"For some time prior to taking hamberlain's Tablets I was troubled with indigestion and constipation. I lacked ambition, and felt tired and worn out. Chamberlain's Tablets af-forded me quick relief, and eventually toned up my system generally and restored me to good health," writes or two S. J. Ryther, Eden Center, N. Y. Obsufficed. tainable everywhere.

AMERICANS WASTE FOOD

Professor Rose Draws Significant Lesson in Economy From Germans

New York-The question of table conomy and the prevalent American waste of food is thus dealt with in the Sun:

If a family of five, using twenty-five bushels of potatoes a year at \$2 a bushel, lose 20 per cent on a bushe by paring, how much money has the family thrown into the garbage can during the year? Answer, \$10.
Applying this conservative estimate

of dietitians to other foods, the av erage family might save at least \$100 a year on its table. It might give father a trip to Bermuda and mothe a trip to California. It might pay John's registration fees at college. 1 might buy Mary furs. It might run some households for a month.

But if the average American pre fers to peel money from his potatoe and let the garbage collector bear i away, the German does not. The dachshund may no longer lick up the crumbs that fall from his maste table, for no crumbs are allowed to fall. Every potato peeling every veg etable top is used. Station master are ordered to plant sunflowers, that once seemed fit only for chickens, in every available bit of ground around the station, so that oil for margarine may be extracted to take the place of butter.

"Our main fault is table waste, rath er than kitchen waste," said Prof Mary S. Rose of Teachers' College who discoursed on the many varietie of waste indigenous to the American household. "Any kind of economy of course, good, but we should em phasize the table end of it. A boarding house throws away enough to keep a family in comfort. Moreover I have no sympathy with 'leaving for man ners': nor with breaking off the cor ner of a nice roll and wasting the

"What should be done with the roll served again or put into some other form?"

"That responsibility for making it problem is with the eater. But we to not have much ingenuity in using up odds and ends, nor much thought in preventing those odds and ends.'

"Can you estimate the difference in a family's yearly expenditure if proper food economy were used?"

"We haven't enough data so that I can say with any accuracy, but I am sure of this, that while a five per cent waste in the kitchen is reason able, a ten or fifteen per cent waste at the table is avoidable. Indeed I think it conservative to say that they is, through careless buying, cooking and serving, a waste of 25 per cent or

Prof. Rose is not, however enthu astic over the use of potato peelings If you bake potatoes and do not ea the skins you waste a great deal, because so much goes with the skin Of course if you eat the skin nothing is wasted. If you boil a potato with he skin on, you waste practicall nothing, for what is left of the ski after you remove the potato from amounts to little. Now if you mak eparate use of the skins as they do n Germany, you must count the la or in working twice with the san octato, while if you boil it in its skir t is handled but once and practically he same amount of nourishment obtained. People seldom count th housewives' labor in advancing these

theories. "It is true we throw away half a head of lettuce instead of using the outer leaves for cream soup, shredding or greens. It is also true that we throw away most of the nourish ment of carrots when we throw away the water in which we boil them, fo carrots are soluble and a considerable part of them is sugar, which come out in the water. We should either use this water in something else and get the nourishment thereby, or we should steam the carrots so that they may retain all their sugar.

As for waste of meat which is most ly waste of fat, Prof. Rose longed for a Mrs. Jack Spratt to dispose of this problem.

STRAY BURRO WORSTS MULE

Latter Handicapped Because Hitched to Ice Wagon. St. Louis, Mo .- A crowd of pedes

trians iln Loughborough avenue wit nessed an unusual battle between s mule and burro, in which the mule handicapped by a tether and harness badly worsted, and probably was would have been bitten and kicked to death had not men with clubs gonto its assistance and beat the burr off.

The mule was attached to an ied wagon. Joseph Cordick, the driver, stopped in front of the home of A. Jackson to deliver some ice, and af ter tethering the mule with a weight attached to a halter, went in to deliver the ice.

A moment later a burro, evident ly astray, without halter or harness appeared on the street, and after is suing a whinny of defiance, charged the mule, Rearing on its hind legs the burro pawed, bit and kicked at the mule, tearing big pieces out of the mule's head and sides

The mule brayed loudly, and the oise finally attracted the attention of Kordick and Jackson, who armed themselves with clubs, and went the aid of the mule. The sight of the men did not frighten the burro, and he started to charge them, but one or two blows from the clubs soon

LIGHT ON A DARK SUBJECT.

The suburbanite is a man who spends his daytime in the city and his salary in the country. He usually is old enough to know better. The suburban ite is a patron saint of transportation companies, snow-shovel makers, per ambulator manufacturers, lawn-mow er grinders, and growers of seed-

grass, garden, and canary. He lunches at Thompson's, dines a home, and eats his breakfast on the road to the station. He knows his way home in the dark

but probably would fail to recognize his bungalow if he were to run up against it in the daytime. The suburbanite usually has a wife,

four children, la grippe, and no permanent cook He sleeps all day Sunday dreaming

of trial-balances. Week-days the ba-bies are sill slumbering when he leaves for the city in the morning and abed when he reaches home at night. Offspring of suburbanites know only by heresay that they have

GAINING DISTINCTION. "Cholly does put away a lot of lem "Yes: he's a hard drinker of soft drinks."

A SABBATARIAN NUT

Orville L. Kiplinger, chaplain of the Michigan City, Ind., reformatory, tells the following instance of a scru ulous conscience:

Some years ago an insane patient was given to the immedest not to say expensive, habit of tearing his cloth ng from him and converting jeans, ticking, denim or whatever clothes were made of into carpet rags The prison physician remonstrated

with the shredding nut as follows: "Say, old man, you're certainly making a lot of unnecessary trouble We don't think it's fair Wouldn't you like to make money? The insane man emphatically aver ed his willingness to make ready

"Well, I'll tell you what I'll do," resumed the doctor. "I will give you ten cents for every day you don't tear your clothes off. Eh?"

The offender assented eagerly, and started in to make good. his clothes remained intact; Wedner day, ditto; Friday and Saturday the His reformation was the talk of the institution.

But on Sunday morning the gar ments the crazy man had worn all week were torn into strips and thrown to the four winds of his cell. "What does this mean?" asked the indignant physician. "I thought I had you hired to keep your clothes on and be good!"

"Well," said the prisoner, innocent ly, "you didn't suppose I was going to work on Sunday did you?"-From

WHEN YOU BUY SALMON When you buy a can of salmon do

you know whether it is "red," or "white" and that all the varieties taste alike and all have about the ame food value? But the packet ells the "chum" or white salmon for ss than half he gets for the red and he only gets 50 per cent as much for pink as for red salmon. So when you pay a high price for "red salmo that it is really marked "red." I learn ed these facts while at the dock a Saldovia looking over the cannery of Mr. Randolph and his associates. The floor adjoining the cannery depart ment was covered with shiny cans of salmon still warm from the boiler There must have been 50,000 cans piled up. As they cooled in the sharp, atmosphere of an Alaskan twi light I heard a popping like that of parching corn. The tops of the cans, hich had swollen in boiling, were shrinking back under the pressure o atmosphere. Every can must be full weight under the law. A China n with a nail or bit of iron with in credible speed strikes the tops of the cans, and instantly by the sound de ts those that are not fully packed These are not numerous. Under the law they cannot be sold and are there fore given away to persons in the neighborhood. As I saw the Admiral Watson taking on thousands of case of salmon at Saldovia I asked Mr Randolph how long the fish then being shipped had been out of the water He said, "Only a day. They go from re to Seattle and can be on your ta ble in New York three or four week after they were caught." Fresh fish

Mr. Randolph said that one of the choicest delicacies he ever ate was mess of breaded broiled hearts of th big king salmon. Some of these fis weigh 180 pounds each, while the reor "sock-eye" salmon average only breads," he added. "It is too bad the are wasted." And so are the fine large livers as big as your hand, and the spawn which if it was sturgeor eggs would command a high price for cavier. Plans to utilize some of these products are being studied by Mr Randolph and by others. Another Tidhit is the little chunk of sweet, ten der meat lodged in the cheek of the salmon, just below the gills. The can ners reserve such delicacies for them elves and their friends, but the time will come when they will find special mention on the menus of the highest The canners get at wholesale only

bout 13 cents for a one pound can o the best red salmon and only half the price for the pink and even less for e white. The red salmon constitu ed only three-sevenths of the pack out three fourths in value of the er tire product. The public prefers the red meat and is willing to pay doubl price for it. So much for gratifyin taste.-John A. Sleicher in Leslies

#### LOST AND FOUND.

It is a world of strange happenings On the Alaska steamer from Seattle was a young lady who bitterly lamen ed to a friend aboard the loss of a pit It was an Elk emblem, gold and jew eled, a present from her brother. Sho had lost it on the street in Seattle just before her departure. She related the circumstances in the presence of another passenger to whom she had just been introduced by her friend This fellow passenger seemed inte ested and finally inquired: "Did yo really lose an Elk pin and did it hav your initials engraved on the back? "Indeed I did," replied the young lady "How did you know about the in tials?" The passenger rejoined, "Well I found it!" He proceeded to relate hat he picked up the pin on the stree in Seattle just before the steamer had sailed. In a few minutes he returned from his stateroom and restored the lost treasure. A happier young wom an than the recipient could not have been found.-From Leslie's,

BRIEF DECISIONS. The Mother Hubbard just simply

had to go out of fashionable literature It wouldn't frou frou.

Isn't it strange considering how fond some men are of attitudes, that they strike them so frequently?

Not every man who gets a good sendoff can come back.

Some people seem to take great delight in looking forward to yesterday.

By and by, every man finds out that he is a fool-but some woman knew i first.

This would be a poor world for critics if nobody accomplished anything The fool never knows better next

ime till it is too late. If you want your income to go up hitch it to an airship .- From Judge.

If honesty were not the best policy there would be a good deal less of it

You never can believe more than half the good that a man tells about himself.

Calling a man a liar is never an argument

The easier it is to reform a man the less it amounts to. Wit without wisdom is sauce with-

A lazy man is a dead loss to himself.

"Adelaide."

a one-act play called "Adelaide." The excellence of his performance led a number of critics to comment on the fact that a capable singer occasionally made a capable actor. This fall Mr. Bispham revived his play. He is no longer a great singer; but by virtue of this misfortune he is an even more capable actor. His audiences canno help feeling that there is a certain identity between the deaf Beethoven and the Bispham whose voice has failed him. His very infirmity adds nower to his acting. One feels the force of truth when the supposed Beethoven says, "Fame is a beggar's cloak for curs to snap at, so long a its wearer is living; but when he is dead, the cloak is turned into death-

David Bispham Opera House TOMORROW NIGHT

## "The Diamond From the Sky"

Beethoven's return to

The play has none of the sine qua

nons of a New York success. No one

is being hounded by the arm of the

law. There are no trench scenes nor

panaoramas of the New York sky-

line by midnight. There isn't even a

chorus-although the subject lends

itself naturally to musical comedy

treatment; Beethoven-in his garret

-in Vienna-a troupe of art stu-

dents-"The Beethoven Glide"-and

all that. Small wonder that the play

should slip quietly into New York as

a purely matinee feature-on the or-

der of Mrs. Whitney's Fashion Show

But it is such theatrical sideshows

that often give us our most interest-

ing drama. "Adelaide" is not a play

of thrills; but it is a pleasing and

unusual treatment of the genius. It

is difficult to put such a man as Bee-

thoven on the stage without vulgariz-

ing him and wounding those who love

him. "Adelaide" is a sincere and sat-

isfying half hour in the life of a great

The play has been translated and

adapted from the German of Hugo

Miller. It opens with a dialogue be

tween Beethoven's landlord and his

washwoman. They comment on the

composer's loss of genality and his

increasing harshness and suspicion

not realizing that it in his deafness

which has caused the change. Then

Beethoven comes in, humming his

latest melody. The washwoman and

the landlord nag him: one wants her

bill paid, the other objects to the com

poser's influence over his daughter

Beethoven cannot hear them; so h

keeps talking about his music, and

jealously conceals the secret of his

deafness. At last, after their yelp-

ing has irritated him beyond suffer-

ance, he drives them from him in

At this point the landlord's daugh-

ter, Clara, comes in. She is the only

person who understands the man's

genius. Moreover, she is the only one

who knows the secret of his deafness

Clara is in love with Franz, a young

musician who helps the composer

with his copying. Beethoven reads

her lips, as she tells him of their love.

He will not understand, she says, for

he has never been in love. Bee-

thoven breaks out into a scornful

laugh. Love? He does not under-

stand love? "Love is the passion of

the sirocco which passes over the

meadows, searing the blossoms and

leaving only the charred steams." He

tells her of Adelaide, a young girl

whom he had loved, many years be

fore, but whom he was too poor to

marry. He will not let-Clara suffer

the same tragedy now. He is poor-

"though he has written as many note:

as there are stars in the heavens, he

could not buy his own coffin;" but he

will write a symphony, and give its

He leaves the room, humming the

first movement of this new undertak-

ing. Then Franz comes in. He has

brought a copy of Beethoven's new

song, "Adelaide," and he sings it to

Clara. As he sings a beautiful worn-

an comes to the door and listens. She

insists upon seeing the composer

Beethoven, angry at the interruption

does not look at her, but asks her

gruffly whether it is an autograph,

sonata, or a lock of his hair that she

desires. He cannot hear voice, and

she thinks he has forgotten her. Then,

accidentally, he turns and recognizes

his visitor. "Adelaide," he cries. She

tells him how she has always loved

marry him. But Beethoven canno

hear her, and she thinks he has ceased

to care. Suddenly he seizes her in his arms, and tells her the secret that he is keeping from the world, lest he

be twitted and jeered at as "the deaf

musician." But he sees the soul of love, as well as the soul of music. It would be madness for them to live together-to know that she was speak-

ing words of love that he could neve

her-so he sends her away, and sits

down, deaf and alone, to play the

strains of "Adelaide." It is not the

course that you and I would have

taken. But then, as the landlord puts

it, "what can you expect of a man

who wraps up a pound of butter in

Mr. Bispham acts the part of Bee-

thoven with a breadth and sincerity

that fully justify the revival. And is

there were more revivals there would

be more variety and better standards
